CHATTAHOOCHEE INDUSTRIAL RAILROAD

Freight Tariff CIRR 0204

NAMING FUEL SURCHARGES ON LOCAL, PROPORTIONAL, AND JOINT LINE RATES FOR CHATTAHOOCHEE INDUSTRIAL RAILROAD

APPLICATION: Unless otherwise specified in the applicable rate document, this publication applies to: (1) all regulated common carrier linehaul freight rates existing or established by CIRR on or after February 1, 2014 and (2) all linehaul freight rates and charges with respect to exempt traffic, and linehaul freight rates and charges in contracts, private price quotations or other pricing documents, that both reference this publication and are entered into or issued and effective on or after February 1, 2014.

In the event the price of West Texas Intermediate Crude Oil (WTI), exceeds \$65.00 per barrel a fuel surcharge shall apply. The fuel surcharge will be applied until the WTI crude oil price falls equal to or below \$65.00 threshold. Beginning with the first day of each month, that month's fuel surcharge figure will be based on the average price of WTI crude oil from two months prior. (e.g. a fuel surcharge applied beginning August 1 would be based on the average daily price of the WTI during the month of June).

The WTI price shall be as published in the Wall Street Journal. If the Wall Street Journal ceases publication of the price of the West Texas Intermediate Crude Oil, CIRR will utilize a suitable substitute source of price or measure.

Monthly the fuel surcharge prices for the CIRR will be posted at www.gwrr.com.
