Scale Test Cars Moving on the IORY

When scale test cars move onto the IORY to any industry, a charge of \$500 will be assessed to that industry for this car movement.

Assembling Unit Grain Trains:

IORY may assemble Unit Trains for online customers.

The following conditions must be met prior to movement of empty equipment on IORY Railroad: A written request must be submitted to IORY Customer Service Team (IORY-CS@gwrr.com) including the following information:

- Number of cars to assemble as a unit
- Inbound interchange location(s) for empty equipment
- Outbound interchange location for loaded train unit
- Date first car(s) are expected to arrive at IORY.
- Estimated date and origin which unit train will be loaded
- Ownership of equipment (private or railroad)

Once written authorization is approved by IORY Customer Service Team, the party requesting assembly of the grain unit train may move forward with empty car billing to the IORY-served grain elevator. If empty railcars are interchanged IORY prior to written acceptance, customer may be assessed an additional assembly fee of \$2,500.

Railroad marked or controlled equipment will not be considered under this item until written car hire relief has been obtained from the controlling railroad. If the controlling railroad denies car hire relief, those empty railcars will be subject to demurrage terms and conditions as found in General Tariff 70067, Item 3115.

The minimum charge to assemble a unit train is \$7,500 for up to 90 railcars. Any railcars beyond 90 will incur an additional \$500 per railcar fee.
