## NEW ENGLAND CENTRAL RAILROAD

### Freight Tariff NECR 9002-C

#### NAMING FUEL SURCHARGES ON LOCAL, PROPORTIONAL AND JOINT LINE RATES FOR NEW ENGLAND CENTRAL RAILROAD

**APPLICATION:** This publication applies to: (1) all regulated common carrier linehaul freight rates existing or established by NECR on or after June 24, 2007; and (2) all linehaul freight rates and charges with respect to exempt traffic, and linehaul freight rates and charges in contracts, private price quotations or other pricing documents, that both reference this publication and are entered into or issued and effective on or after June 24, 2007.

In the event that the monthly average price per gallon of highway diesel fuel (as determined below, the "HDF Average Price") equals or exceeds 201.0 cents, NECR will apply a combined mileage-based and flat-fee fuel surcharge to the linehaul rates and charges described above. The fuel surcharge will be applied to each qualifying shipment having a bill of lading or other shipping instruction dated on or after the first day of the second calendar month following the calendar month of a given HDF Average Price determination (e.g., a fuel surcharge applied beginning August 1 would be based on June's HDF average price).

The "HDF Average Price" for a month will be the average price for that month of U.S. No. 2 Diesel Retail Sales by All Sellers, as determined and published by the U. S. Department of Energy, Energy Information Administration ("DOE-EIA") The referenced DOE-EIA publication can currently be found at [www.eia.doe.gov](http://www.eia.doe.gov). That average price will, in calculating the HDF Average Price, be rounded to the nearest 1/10th of a cent applying conventional rounding principles. If DOE-EIA ceases publication of the above information, NECR will employ a suitable substitute source of price or measure.

The mileage to be applied in calculating the fuel surcharge will be based on PC\*Miler Rail from ALK Technologies. If interline routing is involved, mileages will be calculated via the revenue route junction(s) of the price used to rate the shipment.

Should the cost of fuel increase beyond the matrix listed below, the increase will be \$.014 per mile for each \$.04 increase in the HDF fuel price index

Fuel surcharge percentage for each month will be posted at [www.gwrr.com](http://www.gwrr.com).

ISSUED: May 1, 2013

EFFECTIVE: May 1, 2013
