

## EBOL *Billing out multiple Railcars to the same destination using a pattern*

- A. Click on **CREATE BOL** and select “**Create Multiple BOLs From Pattern.**” Then, select the pattern you want to use for your railcar by clicking on the pattern ID. (You may need to search for your pattern ID on a different page; it will show up as a blue link.)

The screenshot shows the Wabtec Electronic Bill of Lading interface. The 'Create BOL' menu is open, with 'Create Multiple BOLs From Pattern' highlighted. A blue link 'billing ONE car' is visible. Below the menu is a table of patterns with the following data:

Pattern ID	Origin	Destination	Consignee	STCC	Send to Road	STCC Description	TMC	
<a href="#">HAL-GSWR-MTS2STORAGE</a>	HILTON, GA	ALBANY (GSWR), GA	GEORGIA SOUTHWESTERN RAILROAD	1421930	HAL	BALLAST ROCK	R	<input type="checkbox"/>

- B. Next, select the status of your railcars: **Load, Empty, or Revenue Empty.** Then, type in the number of cars you are billing out with this pattern. Click **OK** to advance to the next screen.

The screenshot shows the 'Create Multiple BOLs From Pattern : HAL-GSWR-MTS2STORAGE' dialog box. The 'Type of BOL to Create' is set to 'Single Car'. The 'Status' is set to 'Empty' (radio button selected). The number of BOLs to create is '3'. The 'OK' button is highlighted.

- C. 1) Fill in your Car marks and Numbers in the Equip columns
- 2) Add BOL numbers & Net Weights if applicable (for loaded cars)
- 3) Then, if you are ready to transmit your BOL to the Railroad, click on **CREATE AND SEND** (see definitions below on CREATE button)

If you do not have a BOL number to add, we suggest using the current date here: 12252021

*Definitions:*

**Create and Send:** Will send the billing to the railroad

**Create:** Does not send billing to the railroad. It will send the billing to the “Edit Incomplete BOLs” section of EBOL which is like a pending queue. Once you are ready to send the billing, you can find it in the pending queue here:
