

Georgia Central Railway

Safe, Efficient and Custom Transportation Service for the Paper Industry

Spanning 211 miles across Georgia, the dual-served Georgia Central Railway (GC) connects customers to the North American freight-rail network via interchanges with CSX in Savannah and Norfolk Southern in Macon, offering rail service at least 5 days per week and 1-2-day transit times, as well as 286k capacity.

GC is also now bonded for smoother customs control and has a strong relationship with Georgia Ports Authority, which has experienced record-breaking growth in container traffic over the last decade and includes the Port of Savannah's Garden City Terminal, the largest single container terminal in North America.
